

# HIGH SCHOOL NOTES

(Contributed)

Outside of the lack of a few books, school has opened with the most favorable prospect for a good year's work. Over 150 have already enrolled and others will enter next week. There are 21 in the high school and the full four years' work will be put on for them.

Physics, German and botany together with several half year studies have been added to the course.

The grades are opening up with beautiful regularity and we think the best of order. Music has been placed in every room and will be given twice a week.

The division of one class room into two and the adding of an office room has aided very much in the working of the classes and is a help to those who are in study during other class recitation.

After this week we hope to have every supply and all things in order so that any visitor may inspect our work.

We invite—we urge—every parent to give us a call. Don't complain till you have been in the rooms, then offer us your suggestions.
