

---

✓ Carl Moon, of Bue, a fifteen year old boy, received a bullet wound last Saturday that will probably result in his death. He was riding in a buggy and had with him a loaded rifle of 22 caliber. He was reaching after the rifle when in some way the hammer caught and the rifle was discharged, the bullet penetrating the right breast about two inches and a half below the nipple the bullet glanced off the bone passing downward and penetrating the left kidney. Dr. Bergstrom was summoned who afforded all the relief possible, but the boy is in a very precarious condition.
