

---

—The business men and citizens of Hope held a meeting Monday night to take action in regard to the flouring mill matter. Committees were appointed to attend to the various works necessary in order to secure the mill. The citizens of Hope and the surrounding country mean business, and will do all possible and within reasonable bounds to induce the mill to locate here. Public spirit and enterprise is all that is necessary, and the people hereabout are not lacking in either. That we will secure the plant is almost a certainty.
