

---

—Dr. W. H. M. Philip performed an operation on the person of Mrs. John Nybe, last week, assisted by Dr. Kerr, of Cooperstown, for Necroses, removing a piece of bone as large as a person's finger, from the hip and backbone. The lady had suffered greatly for about seven years, and large running sores had formed on her hip as a consequence of the disease. The family have spent everything they had in doctoring her, taking her to Fargo and Morehead several times for treatment, but to no effect. Dr. Philip thinks now, that with proper care she will recover. Commissioner Day was out with the doctor to visit the family they having asked help from the county, and made arrangements whereby the suffering woman might obtain a few comforts needed so badly by her. This is true charity on the part of the county, and should receive the hearty commendation of every citizen of Steele county.
