

SHARON.

August 19th, 1890.

There has been a mail route established and supplied with a carrier from Pickert to Sharon twice a week, on Tuesdays and Saturdays, so Hope mail comes right through.

Harvesting is about done in this vicinity. Crops not good. 8 or 10 bushels per acre will be about the average.

We had frost Saturday night, August 16th, which killed vines and tender garden truck, but did not hurt the wheat any.

SHARON.
