

# Louis Hafner

## Seriously Injured

---

Wednesday afternoon, while helping saw railroad ties, Louis Hafner received injuries that are very serious, and which will render him practically helpless for some little time. He was engaged in carrying ties to the saw from a pile that was standing upright, and as too many had been taken from one side the pile weakened and fell on him. When he was removed it was found that one leg was badly hurt and internal injuries were feared. Two doctors, one from Cooperstown and one from Hannaford were summoned and they found the knee joint badly dislocated. They immediately set the the bones and gave what medical aid they could to relieve Mr. Hafner's sufferings. At the last report the injury was giving him a great deal of pain.

These people are receiving more than their just share of misfortune, their home having been destroyed by fire recently.
