

6 Will Jones had a narrow es-
d cape Wednesday from sudden
0 death. He was engaged in oil-
f ing his threshing engine while
n in motion, and in some way while
r oiling near the fly wheel, he
t- raised his head too high and a
g part attached to the wheel hit
r him just above the forehead,
il taking quite a piece of the scalp.
e Mrs. Jones happened to be near
n at the time and he was hastened
o to Courtenay where medical at-
tention was given him. It was
y thought at first that he was seri-
ously injured, but the doctor
found that his injury was of
small consequence. He has his
machine at work on the old Jas-
per Dick farm and has several
days of threshing.
