

There are inquiries from Iowa, Illinois, Indiana, South Dakota, and other states, being received by dealers in land in this state, from people who are looking forward to locating in North Dakota, and if the crop yield proves to be near what is now predicted, the influx of settlers into this state will be the largest ever known. A bumper crop will put our state in the front ranks, and the year 1912 will be remembered as the year in which such a thing occurred.

The hobo element is headed for North Dakota, and while this variety of happy-go-lucky class of men have always been numerous, this year will show a shrinkage, as the large amount of farm work will want them as fast as they get in the state, and regardless of the large number now scattering in different parts there will be found jobs wanting men.

Kensal News Items

F. L. Nichols and son, Henry, went to Rock Rapids, Iowa, the latter part of last week and will accompany Mrs. Nichols and the children home.

Mrs. O. B. Christopherson returned from her visit to Iowa and Minnesota Saturday morning.
