BUILDING A SHIPPING CRATE

To Get Correct Proportion and Still Make It Light is Matter Requiring Thought and Experimenting.

To build a strong shipping crate in the correct proportion and still make it light in weight is a matter that can not be carried out without some thought and experimenting and for this reason I have drawn plans and built sample crates in an experimental way until the result is satisfactory to me, and I feel sure will be to those

who wish to build crates after this pattern, writes E. F. Barry, in the Successful Farming.

The drawing will give a correct idea of how to put the crates together and the following lumber bills will if followed give correct results.

The material, if a person is to use any number of these crates of a certain size he can best go to a box factory or mill and have them cut to order.

The long stock should consist of boards any length six inches wide by three-eighths inch thick to be used for bottom. Slats any length three inches wide by three-eighths inch thick. Frame stock any length three inches wide by three-fourths inch thick. Common stock spruce surfaced two sides.

It will be found desirable to make three sizes of these crates of a suitable height for broilers and fryers and at least two sizes for mature fowl and for turkeys.

CURIOUS BITS OF HISTORY

A LIBERTY MARTYR OF LONG AGO

By A. W. MACY.

On June 7, 1381, Wat Tyler was chosen leader by 50,000 men to re-nounce with Richard II. against the oppressions of the people. On June 15 he was dead. In eight days this man, of whose antecedents and personality we know nothing, made for himself a permanent place in English history. During that time he commanded a great army; he confronted the king as an equal; he ordered the execution of the two chief ministers of the crown, and it was done; he wrested from the king a promise of social reform. But in the hour of victory he was struck down by the hand of an enemy, and the great uprising failed in its undertaking. Yet it was not altogether in vain. It stirred to life the desire for personal liberty in the laboring people, a desire that has grown to giant proportions with the passing years. This was the first time that English peasants and laborers asserted that they were men. Centuries afterward some of the seed thus sown found its way across the sea, and today 90,000,000 free Americans owe a debt of gratitude to the memory of Wat Tyler and his men.
