

To Carry Trees Free

In order to encourage the planting of trees in North Dakota, railroads passing through the state have agreed to carry free of charge freight shipments of trees and shrubbery which are ordered by municipalities, counties or townships. The railroads say that they would be glad to extend the privilege to individuals but the interstate commission laws make it impossible for them to do so.

Several agencies, including the North Dakota Better Farming association and the North Dakota Agricultural college, will wage a campaign to induce communities to take steps to plant more trees. Trees are one of the great needs of the state, say the experts. The railroads themselves are taking the lead and trees are being planted across the state on the right of way of every company operating here.
