

# Received Tuberculosis Treatment

THEO. NELSON FIRST IN THIS  
PART OF COUNTRY TO SECURE  
THE MUCH SOUGHT  
FOR CURE

Theodore Nelson has asked the editor for enough space to make a mention of how he feels towards the gentlemen who were instrumental in securing Dr. Mykelstad of Williston, to come here and give Mr. Nelson this treatment. Dr. Myklestad is the first doctor in this state to secure the tuberculosis treatment of Dr. Friedmann, and who, through Dr. Shepard and George Fearris of Williston was brought here. The doctor has all he can take care of at Williston and did not care to leave to give the treatment but these two gentlemen were influential enough to finally get his consent to come. The doctor arrived Tuesday evening and went at once to Mr. Nelson's home and within a short time had his work completed. Mr. Nelson states that he felt no pain whatever from the doctor's work and is greatly encouraged by the treatment. Dr. Mykelstad stated that Mr. Nelson had great chances of being cured, but he would possibly have to have another treatment, but he would be able, by that time, to journey to his office in Williston.

This certainly is pleasing news to all of Mr. Nelson's friends, who are hopeful of a complete recovery.

Dr. Myklestad went to New York shortly after the arrival of Dr. Friedmann and studied this new treatment, and when he started for North Dakota he had several thousand dollars worth of the valuable serum. He has treated a number of afflicted in and about Williston and reports that they are all showing signs of improvement.
