

# Melvin Haugen

## Injured In Saw

---

Melvin Haugen sustained severe injuries to his arm and shoulder last Wednesday while sawing wood with a power saw. A shield which covers the circular saw came loose and got into the whirling blade, with the result that pieces of the shield were thrown with great force against Mr. Haugen who was operating the saw. Several gashes and a vein in his arm were cut, resulting in painful injuries and considerable loss of blood. He was rushed to town and taken to Dr. Wolverton's office where his injuries were dressed, and he will suffer no permanent harm from his unpleasant experience.
