The Best Worker

Money really works. Many people fail to become prosperous because they do not fully understand this fact.

You may be a hard worker but money works harder than you do. You have to stop to rest, to eat, to sleep. Money works all the time day and night. Sundays and holidays, works for you so long as you own it and ceases only when you lose ownership. Put your money in our Bank and start it working for you. If you don't put it there, somebody else will. Begin to-day.
