

Dazey Commercial:—R. M. Stee came in last Saturday and visited over Sunday with home folks, leaving again Monday evening for Valley City. He reports that the pole line of the high tension company is now in as far as Sanborn and that construction from Sanborn to Rogers and Dazey will be begun soon. He states that delivery on the transformers has been promised for Nov. 15th, which is the earliest possible date that this material could be secured. He also stated that he was expecting that the "juice" would be ready to be turned on by Dec. 1, which will be welcome news to all prospective users in the three towns.
