

OF THERE WHILE THE GETTING IS GOOD.

Another unit has been added to the local electric light plant, and will soon be in operation. When this installation is completed the town will have full 24-hour service both for light and power. The new engine is 25-horse power kerosene burner, and the two units will now be sufficiently large to furnish power for the village for all purposes. The Farmers Elevator has been completely electrified, all the machinery, being run by electricity.
