## GENERAL.

Spain's Navy is gradually going to the bottom.

Cuba, will likely succeed in the revolution.

Hayward does not get a new trial. He must hang.

Durrant has written a sort of religious biography of himself. He poses as a martyr and expects to be launched into glory.

Mr. Turtle Mountain Star, we only made a slip in locating the elevator store. We knew it was at Lakota, but somehow said at Rolla.

The Editors of North Dakota will leave Fargo Saturday morning at 7:30 for Atlanta Georgia. Stops will be made at St. Louis, Nashville and Chattanooga while going. Drives will be made over the battle-fields and through the National Cemetery. A trip will be made up Lookout Mountain. The prospects are flattering for an enjoyable trip.

Last week was a star for this office, and our callers pulled on a broad grin when they gazed upon the newly polished stove, the clean office towel which was hanging on the wall, (they generally stand up alone in a corner), and the "biled" shirt the "Devil" was sporting. It was a great week for a printing office and we don't wonder at people smiling.—Waterford, (Ont.) Star.

Mrs. Mary McLaughlin of Hope, N Dak., who is one of the state officers in the Rebecca Lodge of that commonwealth, was tendered a banquet by the order in this city Wednesday night of last week.

A large number of members of the order and guests partook of the spread in honor of Mrs. McLaughlin and a social and enjoyable evening was spent by those present. The affair was held in the Odd Fellows hall.—Henderson County Journal, Oquawka, Ill.

## Why Women Wear Earrings.

According to an old Spanish history of the conquest of New Grenada, the wearing of ear and nose jewels was a privilege of rank among the natives. This was generally the case among all savage tribes, and its prevalence is the scientific reason for the atavism which leads American women to pierce their ears for rings long after they have abandoned the practice of sticking a pin through their noses to indicate their high standing in society.

## The North Pole Moving South.

For the past forty or fifty years the geographers and astronomers have suspected that on account of a "tilting" in the earth's axis, the latitude of all places on the earth's surface is gradually changing. A few years ago (1892) the astronomers decided to make a "test case" of the matter, and now report that the theory is correct. For example, they have proven that Berlin was fifty-one feet nearer the pole in September, 1892, than it was in March of the same year. If Peary and Wellman will only be patient the pole will come to them.
