Dynamite is solidified nit.o-glycerine, and the process of manufacture is very simple, the component parts being common glycerine, nitric acid and silica. As the ingredients taken separately are useful in ordinary manufactures, and two of them at least perfectly harmless, it is difficult to see how it is possible to prevent their sale.

At the recent annual meeting of the Salvation army in London, Gen. Booth stated that the army had now 491 corps. with an income derived from them of £121,000. Alexander F. In case I am cramated, I wish my ashes to be thrown away and not given to or viewed by anybody that had been acquainted with me."

"It is only in New Jersey," says the witty Detroit Press, "that the papers speak of a 'widow' woman.' All other states grant the sex without dispute." Yet New Jersey has good precedents for that form of speech. It follows the old eastern fashion. It was about three thousand years ago that a woman of Tekoah came to King D vid, saying of herself: "I am indeed a widow woman, and my husband is dead." Possibly in Detroit all widows are women, whose husbands are dead. The Bible tells us also of the "widow woman" in Zare-phath who fed Elijah in the days of famine. Bible language seems more famil-iar to dwellers in New Jersey than in Detroit. But when Mr. George Wash-ington Moon has his new Bible com-pleted, that woman of Tekoah's state-ment will be cut down to "I am a wid-

A correspondent of the Boston Post, writing about the remnants of Indian tribes surviving in Massachusetts, says; "It is believed by those who have an opportunity to know, that no Indian of pure aboriginal blood is now a resident in the common wealth, they having from time to time intermarried with the whites and those of African descent. Counting all those who have Indian blood in their veins in the vestiges of tribes remaining, there are today not far from 1,000 persons, embraced in 235 families, and it must be borne in mind, that the numbers contained in these tribes have been decreasing for over 200 years. It is a very significant fact that no tribe now existing is now in-creasing numerically in the Commonwealth.

A very good story is told of Lord Rolle. He commanded a troop of yoeman cavalry, and when they were up for trianing it was reported to him that some of the men had been fighting. He called the offenders before him, and sternly told them that he didn't want any fighting men in his regiment.

"Some years ago," says the Atlanta Constitution, "William Black wrote a book called the 'Adventures of a Phæon,' which was the diary of a ride brough England and Scotland by himself and wife, and was full of the most charming suggestions. Andrew Carne-gie, the wealthy Pittsburg iron manufac-turer, ascertained from the novelist the exact route of the phaeton, town by town, and organizing a party of congen-al friends, took them as his guests on a duplicate trip. President Garfield had agreed to be one of this party, but his unexpected nomination at Cincinnati prevented his leaving the United States."

Russell Sage, the famous dealer in "puts and calis" on the New York Stock Exchange, is regarded as the most phenomenal leader the street has ever had: natural, almost womanly, with mind averse to violence or sinister things; and a feeling also prevails that he has a classical education, which he does not claim for himself. He was in Congress thirty years ago, was the treasurer of Troy City and county many years, and pos-sessed popularity then as now. In Con-gress he wanted the government to buy Mount Vernon.

It is a common belief in Mexico that Montezuma, at the time of Cortez's invasion, ordered all his treasures to be hidden. After his order had been obeyed, he put to death those employed in carrying it out, so that only two persons, himself and his high-priest, were cognizant of the hiding-place.

Occasionally stories are told which seem to indicate that some of the Mexican Indians know where Montezuma's treasures are concealed. Some fifty years ago, a Catholic priest received several valuable contributions to his church from the poorest of his congregation.

The priest learned through the confessional that the vuluables were procured from a cave, and were supposed to be part of Montezuma's treasures. He persuaded a man to lead him to the cave, on condition that he, the priest should

be blindfolded. The clever priest, thinking to outwit the Mexican guide, took several rosaries with him, and contrived to drop the beads one by one on the road. After seeing the cave and its treasures, and returning home blindfolded, the shrewd priest was thus addressed by his shrewder guide.-

"I have kept faith with your reverence; but you had the misfortune to break your rosary, and drop the beads on the way. I picked them all up, and now return them to you; you will not find one missing."

"I Order it Paid."

In order to guard against fraud or error, banks enforce the rule which forbids the payment of a check, drawn to order, unless the party presenting it is known to the cashier or teller. A few weeks ago the rule was the occasion of an amusing scene in a Providence bank.

An uncompromising-looking man walked into the bank and presented a check at the cashier's counter. The cashier, said to him, as politely as possi-

ble,-"I don't know you, sir. You must get identified."

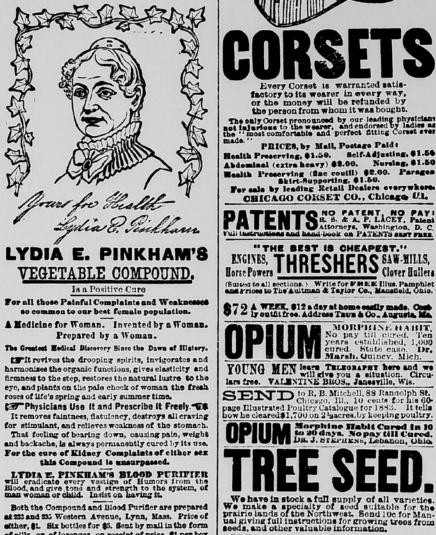

"That's my name thar," replied the ranger, curtly. "Jonathan Windom."

"Yes, but I don't know you." "Yes, but I don't know you." "No I didn't suppose you did, young man; I never was introduced to you. But if I have come from the country, I haint goin' to be sassed by any such little feller as you!"

"THE BEST IS CHEAPEST."

The Wonderful Efficacy of **DR. SCHENCK'S** MANDRAKE PILLS

Has been so frequently and satisfactorily proven that it seems almost superfluous to say anything more in their favor. The immense and constantly increasing demand for them, both in this and foreign countries, is the best evidence of their value. Their sale to-day in the United States is far greater than any other cathartic medicine. This demand is not spasmodic, it is regular and stoady. It is not of to-day or yesterday, it is an increase that has been steadily growing for the last thirty-five years. What are the reasons for this great and growing demand?

Dr. Schenck's Mandrake Pills contain no mer-cury, and yet they act with wonderful effect upon the liver. They cleanse the stomach and bowels of all irritating matter, which, if allowed to remain, poisons the blood, and brings on Malaria, Chills and Fever, and many other diseases. They give health and strength to the digestive organs. They create appetite and give vigor to the whole system. They are in fact the medicine of all others which should be taken in times like the present, when malarial and other epidemics are raging, as they prepare the sysother epidemics are raging, as they prepare the sys-tem to resist attacks of disease of every character.
