COOPERSTOWN, GRIGGS CO., DAY

The harvest of 1880 was the greates in the history of the country, except that wheat was better in 1882. The farmers obtained in 1880 from 164,710,-567 acres of ground corn, wheat, rye, rye, oats, barley, buckwheat, hav, cotton and tobacco worth \$131,051,859.

The decline of stock of all sorts this season is estimated at \$508,673,000. This does not mean that the properties re presented by the stocks are worth a cent less than before, only are quoted at less, owing to a lighter demand for such properties. In most instances if the holders at high prices can afford to hold on, they will ultimately suffer no LOBS.

There are over 5,001.000 children of school age in the United States who are not under instruction, and the "illiterates" in the whole country number 6,752,000. But it must always be remembered that many "illiterates" are not ignorant nor vicious, while the lettered are often found to be extremely ignorant and sometimes dang-rous to the community in which they reside.

By the official statement of food imports into Great Britain for the first eight months of 1883, it is shown that during that period there were received from the United States ninety-five thousand head of cattle, as a rainst thir- Pacific to subscribe the special contract systy-three thousand during the same period of 1882, or usarly triple the number. Our great western plains can supply the world with beef and bread, and are fruitful souces of national and individual wealth and prosperity.

The reduction in the revenues for the o: ening quarter of the first fiscal year of the new taxation laws is, in round numbers, fifteen million dollars, giving a rate of sixty millions a year. This would leave a probable surplus of one hundred millions. How to discose of this surplus first discovery of mineral upon his farm and how to prevent such accumulations for the future, will be the .rincipal questions before the next congress. The advorates of the highest attainable protective tariff wish the whole amount to be taken from the internal revenues, by the lessening abolition of taxes on liq nore and tobacco, while the opposition would have at least a portion taken from the texes on foreign imports.

The mans of Minnesota and of Dakota. published by Messrs. Warner & Foote; 306 Nicollet Avenue, Minneapolis, are the latest, most elegant-and what is of vital importance-the most correct of any ever issued. They show the congressional, township, range, and section boundaries, together with the railroads, main travelled roads, streams, lakes, organized towns, villages, cities and town sites, railroad stations, postoffices, and other essential features never before represented. Every business man. and every intelligent citizen, will prize such maps far beyond their cost. People resuling in such large areas of country cannot do business intelligently without accurate knowledge of their geographical and topographical features. An examination of the reports made by department commanders to the secretary of war, on the causes of desertions from the army, show the following principal causes: First, insufficient quantity of and want of variety of food; second, the great amount of manual labor required to be performed by enlisted men; third insufficient qay; fourth, partiality: e administration of justice; fith, stringency of the regulations governing guar | duty; sixth, the enlistment of bad men in the service. A majority of the department commanders express the opinion that the operation of these causes could be in a large measure redaced without adding materially to the cost of the army. It is thought that the increase in pay recommended by the general of the army, from \$15 to \$16 per month, combined with a revision of the a ou wold fice eff largely i with the first and third causes named. The October crop reports aff .rd an approximate indiction of the yitld of the year. It is, on the whole, bylow the promise of the early part of the year, but it is not so deficient as to have any depressing effect. The cotton crop is now estimate at 6,000,000 bales. This is less than was an icipated but as there is always a full demand for this staple, the dispersed the mob. aggregate value of the vield is toler stable. To a certain extent this is also true of wheat, of which the yield this year will somewhat exceed 400,000,000 bushels. This is about 20 per cent below the crop of last year, and the quality is said not to be up to the average. Corn has suffered from frost in the north and north-west, and from drought in the east and south, and is considerably below the average standard. Oats and potatoes show a good record, while that of tobacco is below the average. On the whole those interests which depend upon the crops of the country have a mir prospect, but nothing more.

Long Suppressed Scandal Published

Daniel R. Vermilve was arres ed in Chi cago last week, charged with embezzling \$3000 from Weem's stone and marble com pany. Suits are also brought against him by Gen. William Myers, retired las winter alter thirty years of heuorable s-rvice in the army. One is to recover \$20 000, give by him to Vermilye for investment in real estate on the line of the Northern Pac fi ;

the other, \$25 000 damages for slander, in volving the name of sen. Myers with that of Mrs. V-rmilye. Vermilye, it seems, is a of a weathy lamily, in Orange, N. J., and two years ago went to Et Paul, where Gen. Myers was stationed, and

entered the employ of the Nor hern Pacific railroad. Gen. Myers became intimate wi h him and his wite, and, on Vermilye's rep resentation that he could give valuable pointers about land on the line of the rail road, invested money with him at James-town, Mandan and other places. Gen. Myvers says, regarding his relations with Mrs Vermilye, that they have been only those of riendly acquaintance, he having knows her mother in the es t, and Mrs. Vermily-

and his wife are intimate friends. Gen Myers—who is a handsome, well-preserved gentleman of fif y-two or three-has the reputation, justly or unjustly acquired in more younnal days, of oring ingave rise to gussip, and even to direct crwr-ges of wrong, none of which were substa-tiated, how ver, and the close relations subis ing between My-rs and Vermilye wer pointed to by friends of the former as a re lutation of the stories of wrong implicating

the wile of the latter. The whole business was an exciting scan-dal two years ago in St. Paul, but wa-kept out of the papers. In the meantime Gen Myers retired. Mrs. Ve milve is now in Orange where she has brought suit for divorce against her errant bushand. The bill, a copy of which was sen by a repor-ter, charges Vermilye with having volunta ri'y left his wile, with "gross and victous babits," making the martial relation intolerable, with drinking and other vices to such an extent as to make him unfit for business, with ishonesty in his business deatings, and with written acknowledge ment of having frequented disreputable houses.

Death of Capt. Mayne Reid.

Capt. Mayne Reid, the novelist, died the evening of the 22nd., in Lonion after a bort illness, aged sixty five years. Raid was born in the North Ireland in 1818. He was the son of a Presbyterian minister, and was educated for the church, but set out is 1838 for America. Ar. iving at New Orleans the engaged in tr diag and bunding excursions up the R d and Missouri rivers, and traveled through nearly every state in the Union, Subsequently he set led in Phil-adelphia, joined the army in the Mexican war and was wounded in the assault upon war and was would use in the assault upon Chapultepec. In 1849 he set out to fight for the Hungsrians during their strugge ith Austria, but the revolution had been suppressed before he reached Paris. He attenward lived chiefly in London, and anterward inved chienty in London, and wrote a series of very poullar books for boys. Among his works are the R fiel Ran gers, The Scalp Hunters, The Q hadroon, Osceola, R in Away to Sea, The Cuiff Cham-bers, Alloat in the Forest, The Child Wife, The Castaways, a d the Finger of Fate. reaseate milkmaid. No longer is it de-plorable to be strong. A dipose tissue is despised and muscle is excelled. "Feel that," said a friend whom I met in a parlor, after 1 season out of doors. "She put my hand on her arm, mid-way between the elbow and the shoul-der. The skin was as smooth and white as ever under a single thickness of lace, and the roundness was charming and the roundness was charming. "Grip hard," she commanded.

I classed the arm with both hands. Then she shut her fist and drew it slow-ly up to her shoulder. Under my hands rose such a bunch of muscles as I had never telt before, except when hanging on to a brawny partner in a waitz. This girl had been rowing daily all summer. The palms of her hands are calloused and she has to wear gloves a whole size bigger than she used to, but she is e ated all the same. She doesn't lift so much as a cup of tea without managing to bring up that muscle, and I actually saw ber writing a letter and making the biceps show through the tight sleeve of her dress at every stroke of the pen.
