RE-INVESTIGATED.

A Remarkable Statement Fully Confirmed by Three Important Inter-

An unusual article from the Rochester, N. Y., Democrat and Chronicle was published in this paper recently and has been the subject of much conversation both in professional circles and on the

Dr. J. B. Henion, who is well known not only in Rochester, but in nearly every. part of America, sent an extended arti-cle to this paper, a few days since, which was duly published, detailing his re-markable experience and rescue from what seemed to be certain death. It would be impossible to enumerate the personal enquiries which have been made at our office as to the validity of the article, but they have been so numerous that further investigation of the subject was deemed an editorial necessity.

With this end in view a representative of this paper called on Dr. Henion at his residence, when the following interview occurred:

"That article of yours, doctor, has created quite a whirlwind. Are the state-

ments about the terrible condition you were in, and the way you were rescued su h as you can sustain?" Every one of them and many addi

tional ones. Few people ever get so near the grave as I did and then return, and I am not surprised that the public think it marvelous. It was marvelous."

"How in the world did you, a physician, come to be brought so low?"

By neglecting the first and m stsimple symptoms. I did not think I was sick. It is true I had frequent headaches; felt tired most of the time; could eat nothing one day and was ravenous the next; felt dull, indefinite pains, and my stomach was out of order, but I did not think it meant anything serious."

"But have these common ailments anything to do with the fearful Bright's disease which took so firm a hold on you" "Anything? Why, they are the sure indications of the first stages of that dreadful malady. The fact is, few people know or realize what alls them, and I am sorry to say that too few physicians do sorry to say that too few physicians do

'That is a strange statement, doctor.' "But it is a true one. The medical profession have been treating symptoms instead of diseases for years, and it is high time it ceased. We doctors have been clipping off the twigs when we should strike at the root. The symptoms I have just mentioned of any unusual action or irritation of the water channels indicate the approach of Bright's disease even more than a cough announces the coming of consumption. We do not treat the cough, but try to help the lungs. We should not waste our time trying to relieve the headache, stomach, pains about the body or other symptoms, but go directly to the kidneys, the source of most of these ailments.

"This, then, is what you meant when you said more than one half the deaths which occur arise from Bright's disease, is it doctor?"

'Precisely. Thousands of so-called diseases are torturing people to-day, when in reality it is Bright's disease in when in reality it is Bright's disease in some one of its many forms. It is a Hydra headed monster and the slightest symptoms should strike terror to every one who has them. I can look back and recall hundreds of deaths which physicians declared at the time wave counted by possible to the time. were caused by paralysis, apoplexy, heart disease, pneumonia, malarial fever and other common complaints whi see now were caused by Bright's dis-

"And did all these cases have simple symptoms at first?"

"Every one of them, and might have been cured as I was by the timely use of the same remedy—Warner's Safe Cure. I am getting my eyes thoroughly open in this matter and think I am helping others to see the facts and their position."

Gen. Crook says the Indians conquery. ers to see the facts and their possible danger also. Why, there are no end of truths bearing on this subject. If you want to know more about it go and see Mr. Warner himself. He was sick the same as I and is the healthiest man in Rochester to-day. He has made a study of this subject and can give you more facts than I can. Go, too, and see Dr. Lattimore the chemist, at the university. sity. If you want facts there are any quantity of them showing the alarming increase of Bright's disease, its simple and deceptive symptoms, and there is but one way by which it can be escaped."

Fully satisfied of the truth and force of the Doctor's words, the reporter bade him good day and called on Mr. Warner at his establishment on Exchange street. At first Mr. Warner was inclined to be reticent, but learning that the information desired was about the alarming in-crease of Bright's disease, his manner Hill' changed instantly and he spoke very

'It is true that Bright's disease has increased wonderfully, and we find, by re-liable statistics that in the past ten years at the prominent men it has carried off: Everett, Sumner, Chase, Wilson, Carpenter, Bishops Haven and Peck, and others. This is terrible, and shows a greater growth than that of any other known complaint. It should be plain to avery our that carried its part of the same than the carried of the same than the s every one that something must be done to check this increase or there is no knowing where it may end."

Do you think many people are afflict-with it to-day who do not realize it,

Warner?

'Hundreds of thousands. I have a striking example of this truth which has just come to my notice. A prominent professor in a New Orleans medical colege was lecturing before his class on the subject of Bright's disease. He had vaous fluids under microscopic analysis, il was showing the students what the dications of this terrible malady were. In order to show the contrast between healthy and unhealthy fluids, he had provided a vial, the contents of which were drawn from his own person. 'And now, gentlemen,' he said, 'as we have seen the unhealthy indications, I will show you how it appears in a state of perfect health, and he submitted his own haid to the usual test. As he watched he results his countenance suddenly hanged-his color and command both him, and in a trembling voice he 'Gentlemen, I have made a pain- other month.

ful discovery; I have Bright's disease of the kidneys,' and in less than a year he was dead.

'You believe, then, that it has no symptoms of its own and is frequently unknown even by the person who is af-flicted with it?"

"It has no symptoms of its own and very often none at all. Usually no two people have the same symptoms, and frequently death is the first symptom. both in professional circles and on the street. Apparently it caused more commotion in Rochester, as the following from the same paper shows:

Dr. J. B. Henion, who is well known

Dr. J. B. Henion, who is well known

"You know of Dr. Henion's case."
"Yes, I have both read and heard of

'It is very wonderful, is it not?" "A very prominent case but no more so than a great many others that have come to my notice as having been cured by the same means."

"You believe then toat Bright's dis-

ease can be cured?"
"I know it can. I know it from the experience of hundreds of prominent persons who were given up to die by both their physicians and friends."

"You speak of your own experience, what was it' "A fearful one. I had felt languid

and unfitted for business for years. But I did not know what ailed me. When, however, I found it was kidney diffi-culty, I thought there was little hope, and so did the doctors. I have since learned that one of the physicians of this city pointed me out to a gentleman on the street one day, saying, 'there goes a man who will be dead within a year." I believe his words would have proven true if I had not fortunately secured and used the remedy now known as Warner's Safe Cure.'

'And this caused you to manufacture

"No it caused me to investigate. I went to the principal cities, saw physicians prescribing and using it and I therefore determined, as a duty I owed humanity and the suffering, to bring it within their reach and now it is known in ever part of America, is sold in every drug store and has become a household necessity."

The reporter left Mr. Warner, much impressed with the earnestness and sincerity of his statements and next paid a visit to Dr. S. A. Lattimore at his residence on Prince street. Dr. Lattimore, although busily engaged upon some matters connected with the State Board of Health, of which he is one of the ana-

lysts courteously answered the questions that were propounded him.
"Did you make a chemical analysis of the case of Mr. H. H. Warner some three years ago, doctor"
"Years is"

"Yes, sir."
"What did this analysis show you?"
"The presence of albumen and tube casts in great abundance."

'And what did the symptoms indicate?

A serious disease of the kidneys." "Did you think Mr. Warner could re-

"No, sir. I did not think it possible. It was seldom, indeed, that so pronounced a case had, up to that time,

"Do you know anything about the remedy which cured him?"
"Yes, I have chemically analyzed it

and upon critical examination, find it entirely free from any poisonous or deleterious substances.'

We publish the foregoing statements in view of the commotion which the publici-ty of Dr. Henion's article has caused and to meet the profestations which have been made. The standing of Dr. Henion, Mr. Warner and Dr. Lattimore in the community is beyond question and the statements they make cannot for a moment be doubted. They conclusively show that Bright's disease of the kidneys

the reservations, where they could not rival the contractors at their own business. White speculators and rascally agents are accountable for a great deal of Indian trouble.
